DORZIM-I® Porzolamide 2% / Timolol 0.5%

Read all of this leaflet carefully before you start using this medicine because it contains important information for you.

 Keep this leaflet. You may need to read it again.

 Always use this medicine exactly as described in this leaflet or as your doctor or pharmacist told you.
 Ask your pharmacist if you need more information or advice.

•This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their signs of illness are the same as yours.

 If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet.

What is in this leaflet:

1.What DDRZIM-I Drops are and what they are used for.

What you need to know before you useDDRZIM-IDrops.

3.How to use DORZIM-IDrops.

4.Possible side effects.

5. How to store DDRZIM-I Drops.
6. Contents of the pack and product description.

1.What DDRZIM-I Drops are and what they are used for

Category. Anti glaucoma

DIRZIM-IDrops are a combination of two medicines: Dorzolamide and Timolol. Dorzolamide belongs to a group of medicines called carbonic anhydrase inhibitors. Timolol belongs to a group of medicines called beta blockers. DIRZIM-IDrops are prescribed to lower raised pressure within the eye in the treatment of glaucoma when beta blocker eye drops used alone are not adequate.

2.What you need to know before you use DDRZIM-I Drops Caution

Do not use DDRZIM-I if you are: *Allergic to Dorzolamide or Timolol, beta blockers or any of the other ingredients of this medicine.

Do not use in your eyes if you:

 Have now or have had in the past respiratory problems such as asthma, severe chronic obstructive lung disease (severe lung disease which may cause wheeziness, difficulty in breathing and/or long-standing cough).

long-standing cough).
-Have severe kidney problems, or a prior history of kidney stones.

-Have a disturbance in the pH (acid/alkali balance) of your blood. Have certain heart problems, including certain heart rhythm disturbances producing an abnormally slow heart rate or severe heart failure.

-Coronary heart disease

*Coronary heart disease (symptoms can include chest pain or tightness, breathlessness or choking), Prinzmental's angina (chest pain while resting), heart failure, low blood pressure.

 Poor blood circulation disease (such as Raynaud's disease or Raynaud's syndrome)

Raynaud's syndrome).

•Diabetes as DORZIM-I Drops may mask signs and symptoms of low blood sugar.

•Overactivity of the thyroid gland as D□RZIM-I Drops may mask signs and symptoms.

 Liver problems, if you have muscle weakness or have been diagnosed as having myasthenia gravis

Take special care with DORZIM-I Drops:

If you develop conjunctivitis (redness and irritation of the eyes), swelling of the eye or eyelids, skin rash or itching in and around the eye contact your doctor immediately. You should be aware that if you are using D□RZIM-I Drops in your eyes your doctor may need to check your eyes frequently during your treatment.

*Tell your doctor if you develop an eye infection, receive an eye injury, have eye surgery, develop other reactions or worsening of symptoms.

Other medicines and DORZIM-I

 Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines.
 Before surgery and anaesthesia (even at the dentist), tell your doctor or dentist that you are using DDRZIM-I Drops, as this medicine may change effects of some medicines used during anaesthesia and there may be a sudden fall in blood pressure associated with the anaesthetic.

You are taking antihypertensive medicines which are used to lower high blood pressure or medicines to treat heart disease such as calcium channel blockers and beta blockers or digoxin.

 You are taking medicines to treat a disturbed or uneven heartbeat such as quinidine or digoxin.

You are using other eye drops that contains a beta blocker.

You are taking another carbonic anhydrase inhibitor such as acetazolamide. You may be taking this type of medicine by mouth, as eye drops, or by some other method.

You are taking quinidine (used to treat heart conditions and some types of malaria) You are taking monoamine oxidase inhibitors (MAOIs) or selective serotonin reuptake inhibitors (SSRIs) (such as fluoxetine and paroxetine) both of which are used to treat depression or another illness.

You are taking a parasympathomimetic medicine which may have been prescribed to help you pass urine. Parasympathomimetics are also a particular type of medicine which are sometimes used to help restore normal movements through the bowel.

"You are taking narcotics such as morphine used to treat moderate to severe pain or if you are taking large doses of aspirin. Although there is no evidence that dorzolamide hydrochloride interacts with aspirin, some other medicines which are related to dorzolamide hydrochloride and which are taken by mouth, have been known to interact with aspirin.

 You are taking medicines to treat diabetes or high blood sugar.

 You are taking epinephrine (adrenaline).

•If you are using other eye drops or eye ointments, leave at least 5 minutes between each medicine. Eye ointments should be administered last.

*DORZIM-I Drops contain Benzalkonium chloride; Benzalkonium chloride may cause eye irritation and is known to discolour soft contact lenses, therefore contact with such lenses should be avoided. If you wear contact lens you should remove it prior to application and wait at least 15 minutes before putting your lenses back in

Driving and using machines:

DDRZIM-I Drops can cause temporary blurring of vision after application to the eye. Wait until your vision is clear whilst driving or using machines.

Pregnancy, breast-feeding & fertility:

 If you are pregnant, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist advice before using this medicine.
 You should not use DDRZIM-I

 You should not use D□RZIM-I Drops if you are breastfeeding.

3.How to use DDRZIM-I Drops
Always use this medicine exactly
as described in this leaflet or as
your doctor or pharmacist has told
you. Check with your doctor or
pharmacist if you are not sure.

How much to use for adults, the elderly and children

The appropriate dosage and duration of treatment will be established by your doctor. The recommended dose is one drop in the affected eye(s) two times a day.

Instructions for use

If you wear soft contact lenses these must be removed during treatment of the eyes with DDRZIM-I Drops.

1.Before opening a new bottle of Drops, please check that the safety strip on the bottom of the outer cap is unbroken.

2.Twist the outer cap to break the seal.

3. Wash your hands well before use.

4.Remove the outer cap. If you are putting in the drops

yourself you should use a mirror.

5. Tilt your head back and look up at the ceiling.

6.Pull the lower lid of the eye out to form a small pocket between your eyelid and your eye.

7.Hold the container between the thumb and middle finger of the other hand, turn the bottle upside down near to your eye, try not to touch your eye with the nozzle.

8. Apply enough pressure to the container to release one to two drops, or as directed by your doctor.

9. Blink your eye a few times

9.Blink your eye a few times.
10.If you think that you have missed your eye, then insert another drop.

11. Repeat steps 5 -10 in the other eye, if you have been told to use DDRZIM-I Drops in both eyes.

12 Replace the outer cap on the bottle, trying not to touch the applicator tip with anything, including the eye or your fingers.

13. Wash your hands.

If you use more DDRZIM-I Drops than you should: If you are at all concerned that you

If you are at all concerned that you have used too much of this medicine contact your doctor or pharmacist.

DDRZIM-I Drops are for external use only.

If you forget to use DORZIM-I Drops:

Use a single drop as soon as you remember and then go back to your regular dosing routine. However, if it is almost time for your next dose, skip the missed dose before going back to your regular dosing routine. Do not use a double dose to make up for the one missed

If you stop using DORZIM-I Drops:

You should keep using DORZIM-Drops for as long as your doctor has instructed. Your treatment is helping your condition, even if you have not noticed a difference in how you feel. Should you need to stop your treatment, your doctor will advise you how to do this.
